TPMS Light Comes On and Goes Off?

Light Behavior: Illuminates and then turns off seemingly at random.

What it Means: The tire pressure is at least one tire is probably very close to the minimum or maximum rated inflation. As the air contracts, due to cold weather, or heats up, the sensor is triggered.

What you should do: Check the tire pressure and adjust it.

Can you still drive: The air pressure is probably close to where it should be, so it's usually safe to drive. Keep in mind that the vehicle may not handle the way you expect it to.

SHORTCUT BBQ RIBS

This is the easiest, quickest way to grill ribs.

TOTAL TIME: 0:45, PREP: 0:05, COOK: 0:45

LEVEL: EASY

YIELD: 8 SERVINGS

INGREDIENTS

- 1 Rack Baby Back Ribs (about 3 lbs.)
- Kosher Salt
- Freshly Ground Black Pepper
- 4 Garlic Cloves, minced
- 3 tbsp. Brown Sugar
- 2 tsp. Smoked Paprika
- 1 c. Barbecue Sauce

DIRECTIONS

1. Preheat grill over medium-high heat. Cut ribs into 3 sections.
2. Add to a large pot filled with enough water to cover ribs. Add about 1 tablespoon salt, bring to a boil and simmer for 20 minutes. Drain ribs and place on sheet pan. Dry well with paper towels.
3. Meanwhile make spice rub. Combine garlic, brown sugar, paprika, 1 teaspoon salt, and 1/2 teaspoon black pepper in a small bowl. Spoon the mixture onto the ribs and rub all over with hands.
4. Place ribs on grill or grill pan and cook for 10 minutes, turning halfway through. Brush barbecue sauce on ribs and cook for 1 minute more until lightly charred. Serve ribs with barbecue sauce.

BAD DAD JOKES!

Classic lines only a Dad could find funny!

by Allan Plenderleith

Why Should I Visit the **Pisciottano Chiropractic Center** for a **Post Accident Evaluation**?

A car accident is the last thing anyone needs. Life is busy enough without thinking about how you are going to get here, there and anywhere. Most people don't realize that even minor car accidents can lead to injuries. Sure, we go to the hospital after an extensive car accident, and rightly so. But even those who are lucky enough to "walk away" from an accident may suffer painful musculoskeletal damage. A vehicle doesn't absorb the full shock of the crash, your body does! Any time your body is jerked in response to a collision, the possibility of injury is there. **Whiplash** can occur at speeds less than 10 mph. The force of the impact during a car collision can also cause other neural, muscular, and/or skeletal problems.

Often these injuries are often not felt until hours or even days later. **We advise waiting no longer than 72 hours after your accident for a Post Accident Evaluation.** Using our state-of-the-art computerized analysis & adjustment tool, the **PRO-ADJUSTER**, our doctors accurately and comfortably locate and ultimately correct spinal misalignments. The doctor precisely checks each individual bone in your neck and back to determine which one(s) need to be adjusted. The **Objective Report of Findings** associated with a **PRO-ADJUSTER** screening helps to provide a care plan that will stand up to any future scrutiny. And, when the time comes, the same instrument, a gentle percussion (repetitive tapping) is used to restore the proper motion to the affected joints of your spine. It is fantastic compliment to manual adjustments.

Are you outside that 72 hour window and **NOW** experiencing headaches, blurred vision, shoulder, neck or back pain? It's not too late for a **Post Accident Evaluation**. While claims to insurance coverage for medical bills should be opened as close to possible to the actual date of the accident; there is an acceptable window of 24 months to obtain treatment. Not only can we help you with on your physical road to recovery, we will guide you through all necessary paperwork to assure your treatment and associated expenses are covered.

Yours in Good Health,
Dr Geno Pisciottano

The Pisciottano Chiropractic Center is located at 300 Cedar Hill Drive in McMurray, www.pccmcmurray.com.

AAA Expects 8.7 Million Stranded Motorists During Summer Travel Season

The Nation's largest motor club encourages all drivers to do three easy maintenance tasks to help avoid becoming stranded, improve their safety and save money on gas.

The summer travel season kicked off with the Memorial Day holiday weekend, and AAA estimates it will come to the rescue of **8.7 million stranded motorists between Memorial Day and Labor Day.**

There are 3 easy maintenance tasks any driver can perform to reduce their chances of becoming stranded, improve the safety of their road trip and even save money.”

The three maintenance tasks AAA recommends all motorists to perform before hitting the road for a summer road trip include:

1. Inspect All FIVE Tires ---- *Lombardi Auto Body & Repair Does it For FREE!*

Many motorists may be confused when told to **check five tires**, however AAA has found one of the most **frequently overlooked** items on a vehicle is the **spare tire**. “Roughly **1.2 million drivers will call AAA for help with a flat tire** during the summer travel season, and many of those problems could be avoided by inspecting the tires before hitting the road,” said Nielsen. **Properly inflated tires also can reduce fuel costs during a trip.**

2. Check and Clean Car Battery --- *Lombardi Auto Body & Repair Will Do it For FREE With An Oil Change!*

AAA estimates it will assist **nearly 1.7 million motorists with dead batteries during the summer driving season**. Summer heat breaks down car batteries internally and accelerates the rate of corrosion on the vehicle’s battery terminals.

3. Replace Wiper Blades and Refill Washer Fluid --- *We’ll install new wiper blades at no cost when you purchase the blades from us.*

Rain, insects, grime, and other debris on a windshield will compromise the driver’s vision, and safety, if the windshield wipers cannot remove them.

This summer, AAA will remedy three out of five motorists’ car problems at the roadside and get them back on the go. However, an **estimated 3.7 million drivers will suffer more significant troubles** that will **require towing to a place of repair**. Regular vehicle maintenance can help a motorist **avoid becoming one of the unlucky drivers** who end up spending part of their summer vacation hooked to a tow truck.

We at **Lombardi Auto Body & Repair** Offer a **FREE Courtesy Inspection with your oil change** that covers all 3 of these suggestions and much more to give you peace of mind your car is road ready for the summer driving season.

Give us a call now to schedule your oil change before hitting the road!

Warning: --- Special Report!

Money saving information that other shops may NOT tell you...

When gas prices increase drivers (especially younger drivers), have a tendency to allow **their fuel level to get very low, simply due to finances.**

Most do NOT REALIZE this can lead to an expensive repair, especially during the HOT summer months. When your vehicle is operated with the fuel level **below a ¼ tank** you take the risk of causing **damage to your fuel pump**, in many cases causing it to **fail**, this is especially true when temperatures rise!

Surprising but Critical Information

Most vehicles have fuel pumps located **inside the gas tank**, one very important aspect to that, believe it or not, it is intended for the **fuel in the tank to help keep the pump cool during operation**. When the fuel level gets low the fuel is not cooling it, the **pump overheats** and over time this will **cause it to fail**. We often see this in cars driven by teens because they often don't have enough money to keep the fuel level above a quarter tank in their cars.

We often see a jump in fuel pump failures when gas prices go higher!

Replacing in-tank fuel pumps is **very expensive**. It is not uncommon to see prices that are in the **\$500-\$1500** range and higher on some models.

You CAN avoid paying that hefty sum of money!

**URGENT
INFORMATION**

Although we will gladly take care of this repair, should you need it, we would like to **help you avoid this expensive repair**. There are many repairs on your vehicle that you cannot avoid due to wear and tear; this is one that **you CAN do something about**. All you really need to do is **maintain ¼ tank of fuel or more** in your vehicle to make sure that there is enough to keep the pump cool, **resist the temptation** to wait out a price increase and you will **save a lot more in the long run**.

Because **you are one of our valued clients**, we want to help you avoid this potentially expensive repair. If you have **any questions** about this or anything else about your car, please give us a call at 724-222-3077.
